

# Confusing Colours

Here's a really cool little trick that anyone can do. Its easy to make and really quick too. Start by printing out this sheet. Its better to do it on card as the boomerangs will last longer. Once printed, cut out the red and green boomerangs below.

www.MarkDaniel.co.uk

## How to Perform

Show your audience the red boomerang and then hold the green one above it. The green one appears to be shorter than the red one.

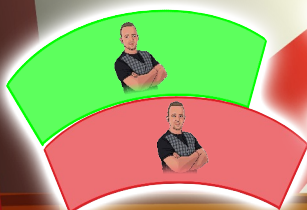

Pretend to stretch the green one.

Show the two boomerangs again. This time you hold the red one above the green one. Now the red one seems to be the shortest.

Now pretend to stretch the red one.

Once again hold them both as in Step 1. Now the green one is the shorter of the two!

Pretend to stretch the green one then pretend to squash the red one.

Hold the two boomerangs, one on top of the other. They are now magically the same size!
