

Bolton PHOTOBOOTHS

SELFIE POD

This slick and compact Selfie Pod is perfect for venues where space is limited. The modern design with colour-changing LED sidelights features a touch screen interface that can capture your images then send to the user instantly (subject to venue's WIFI supply) by text or email (completely optional of course). All photos supplied to the hirer after the event via Dropbox.

A cheaper alternative to our LED inflatable booth as no attendant required.

Use the Selfie Pod on its own or add one of our dye-sub printers for instant personalised prints at your event.
